## DIFFUSER WITH 360 DEGREE AIR DISCHARGE PATTERN

The DVCP is a round freestanding circular displacement diffuser designed for floor mounted applications. It provides a 360° air distribution discharge pattern. The DVCP is designed to supply a large volume of air at low velocity into the occupied space and works well in lobbies, airports and restaurants. This model can contribute toward achieving LEED EA Credit 1: Optimize Energy Performance; IEQc2: Increased Ventilation; and IEQc7.1: Thermal Comfort - Design.

### FEATURES & BENEFITS

- Can contribute toward energy savings
- Easily adjustable air pattern controllers to change airflow spread pattern
- Standard finish is #26 white (powdercoat)
- Wood grain finish options available
- Mounting base and telescopic duct cover are available as accessories
