

# CT

Titus CT linear bar diffusers are designed for both heating and cooling applications, supply as well as return. Available in eight different core styles plus a wide selection of frames and borders. These diffusers can be used for ceiling, side wall, or sill installations. Accessories such as directional blades, dampers, blank-offs, access doors and mitered corners make these diffusers even more versatile.

## FEATURES & BENEFITS

- Designed for both supply and return applications
- Standard lengths are 1, 2, 3, 4, 5, and 6 feet
- Sections can be joined end-to-end for continuous appearance
- All deflection bars are fixed and are parallel to the long dimension
- Border types 5, 6, and 15 are the only frame styles available for floor applications
