

TBM

modular air handler

TBM design allows you to configure draw-thru applications in horizontal, vertical and footprint saving arrangements. The TBM sets the new standard for quality, flexibility and competitive pricing. This product is engineered to satisfy the most basic air-handling requirements.

Features and Benefits

- Modular construction allows footprint savings by stacking modules in two-high configuration
- Single wall and double wall-galvanized construction equipped with removable access panels/hinged doors for improved accessibility and serviceability
- Hot Water, Chilled Water, Steam, and Direct Expansion (DX) coils available
- Blow-thru electric heat with single point power connection
- Customized options including double-sloped IAQ galvanized drain pan, direct drive plenum fans, high-efficiency filters, double wall perforated lining, external face and bypass dampers, and inspection windows
- 600 - 10,000 CFM nominal airflows
