

dvri

WALL DIFFUSER FOR FLUSH OR SURFACE MOUNT ORIENTATION

The DVRI is a rectangular displacement diffuser that can be positioned against the wall in a flush or surface mount orientation. It has a one-way air distribution pattern and supplies a large volume of air at low velocities into the occupied zone. This model can contribute toward achieving LEED EA Credit 1: Optimize Energy Performance; IEQc2: Increased Ventilation; and IEQc7.1: Thermal Comfort - Design.

FEATURES & BENEFITS

- Can contribute toward energy savings
- Easily adjustable air pattern controllers to change airflow spread pattern
- Standard finish is #26 white (powdercoat)
- Wood grain finish options available
- Mounting base and telescopic duct cover are available as accessories
