## **Titus** Submittal

## Air Balancing Devices Equalizing Grid • Duct Mounted For Round Necks

Model: EG

## Standard Finish: #26 White General Description —

• The TITUS EG is a duct mounted equalizing grid used in round duct applications.

• Specially designed TITUS vanes give maximum control of air flow with minimum noise and turbulence due to sizing and vane spacing.

• The EG balances the flow of air into the air duct.

• Vanes are individually adjustable with friction pivots to hold the desired settings and provide rattle free performance.

 Model EG is shipped loose for field installation.

Material is steel with extruded aluminum blades.

Note: This submittal is meant to demonstrate general dimensions of this product. The drawings on this submittal are not meant to detail every aspect of the product with exactness. Drawings are not to scale. TITUS reserves the right to make changes without written notice. 605 Shiloh Road • Plano, Texas 75074 • 972-212-4800
