

FOR IMMEDIATE RELEASE

**Titus HVAC Announces Industry First Architectural Finishes for Grilles and Diffusers**

*Aesthetically Pleasing Finishes Include Woodgrain and Marble*

**PLANO, TX – July 9, 2013** – Titus HVAC, the leader in air management, has launched a line of architectural finishes for grilles and diffusers, helping architects give building interiors a sleeker more elegant look. The introduction represents the first of its type to incorporate woodgrain and marble finishes.

“Titus architectural finishes that look like marble or woodgrain in grilles and diffusers are an easy way to enhance the appearance of commercial properties,” said Jenny Sivie, director of advanced business development at Titus HVAC. “These finishes help provide cost savings and value to building owners and managers, while increasing the appearance.”

Wood, a symbol of sophistication and cultivated beauty in furniture and fixtures, brings unique warmth and beauty to any space, while aluminum is a tried and true element of air distribution because of its flexibility, sturdiness and lightweight. Combining the wood and aluminum give the products the aesthetically pleasing look from the wood with the flexibility and sturdiness of the aluminum, which is most beneficial for buildings.

According to Sivie, Titus has had such heavy interest in the woodgrain and marble grills and diffusers that the company is rapidly expanding its line. Currently, Titus offers more than 40 different types of finishes across a variety of Titus grilles and diffusers including the Titus OMNI diffuser, Displacement Diffusers for Flush Mounts and Fan Coil Doors. For more information on woodgrain and architectural finishes or other air management products from Titus HVAC, visit [www.titus-hvac.com](http://www.titus-hvac.com).

**About Titus HVAC**

As the world leader in advancing the science of air distribution and air management training, Titus HVAC works to make life better by improving the health, efficiency, sustainability, comfort and aesthetics in commercial building environments. Founded in 1946, Titus HVAC provides a breadth and depth of air management products and design tools that includes displacement ventilation, chilled beam, underfloor, grilles, diffusers, terminal units, fan coils and advanced training.
