

dvvc

CORNER MOUNT DISPLACEMENT DIFFUSER WITH A 90 DEGREE AIR DISCHARGE PATTERN

The DVVC is a corner mount displacement diffuser that is designed for corner mounted applications. The units have a two-way air distribution pattern and easily adapts to different floor layouts. They supply a large volume of air at low velocity to the occupied zone by using newly enhanced pattern controllers. This model can contribute toward achieving LEED EA Credit 1: Optimize Energy Performance; IEQc2: Increased Ventilation; and IEQc7.1: Thermal Comfort - Design.

FEATURES & BENEFITS

- Can contribute toward energy savings
- Easily adjustable air pattern controllers to change airflow spread pattern
- Standard finish is #26 white (powdercoat)
- Wood grain finish options available
- Mounting base and telescopic duct cover are available as accessories
