

Atlas

CEILING GRID SYSTEM

Integrated ceiling system offers simple, effective, and flexible solutions for hospitals and cleanrooms

The Atlas Operating Room Ceiling System (AORCS) makes it quicker and easier to build critical environment spaces with future flexibility in mind. Each system is custom engineered to meet the requirements of codes and guidelines, such as ASHRAE Standard 170 and the Facility Guidelines Institute (FGI) 'Guidelines for Design and construction of Hospitals and Outpatient Facilities.'

Used to support diffusers, blank-off panels, and light fixtures, the Atlas Ceiling System also creates a barrier between the space and ceiling plenum to prevent transmission of contaminants.

- » Custom Engineered Solutions
- » Heavy-duty extruded aluminum construction
- » Antimicrobial powder-coat finish and gasket
- » Pre-cut at factory for rapid assembly in the field with "quick snap" connectors
- » "Quick snap" connectors allow for easy reconfiguration in the field
- » Factory supplied blank-off panels to match air distribution
