

dvri-hc

HEATING & COOLING DISPLACEMENT UNIT

The DVRI-HC “Plexicon” is a dual function diffuser that combines displacement ventilation and mixed air from one unit. It provides displacement cooling from the top section of the diffuser and traditional heating from the bottom section. The unique dual plenum design utilizes a single supply duct connection for ease of design and installation. This model can contribute toward achieving LEED EA Credit 1: Optimize Energy Performance; IEQc2: Increased Ventilation; and IEQc7.1: Thermal Comfort - Design.

FEATURES & BENEFITS

- Heating and cooling from one unit
- Can contribute toward energy savings
- Easily adjustable air pattern controllers to change airflow spread pattern
- Standard finish is #26 white (powdercoat)
- Wood grain finish options available
- Mounting base and telescopic duct cover are available as accessories
