

TAF-L-R

UNDERFLOOR FIXED LINEAR BAR DIFFUSER RETURN PLENUM

The TAF-L-R is a fixed linear bar diffuser plenum constructed of galvanized steel for underfloor perimeter return applications. The return plenum drops into the perimeter slot and sits on top of the raised floor tile. This model can help contribute toward achieving LEED Credits.

FEATURES & BENEFITS

- A fixed linear bar diffuser plenum for underfloor perimeter return applications
- Designed to be integrated with the CT-TAF-L linear bar grille
- Drops into perimeter slot and sits on top of the raised floor tile (by others) and a perimeter angle
- 20" x 8" inlet can be used for ducted or non-ducted applications
- Unit Size: 48" length
