

Heats. Cools. Wow.

The DVRI-HCS "Solar Plexicon" is a solar powered, energy-harvesting dual function diffuser that combines displacement ventilation and mixed air from one unit. It provides displacement cooling from the top section and traditional heating from the bottom section of the diffuser. For details about the Solar Plexicon, visit <http://bit.ly/2sZIQJs>

FEATURES AND BENEFITS

- Ambient light-powered diffuser that combines heating and cooling from unit
- Can contribute toward energy savings
- Easily adjustable air pattern controllers to change airflow spread pattern
- Standard finish is #26 white (powdercoat)
- Wood grain finish options available
- Mounting base and telescopic duct cover are available as accessories
