

green seminar

CLASS OBJECTIVES:

The purpose of this seminar is to provide the information necessary for the Consulting Engineer to understand and specify HVAC products that will save energy, increase occupant comfort, and increase indoor air quality on projects requiring LEED certification.

Topics include:

- What is "Green"?
- Why "Green"?
- LEED Rating System
- Cost and Benefits of Green
- Air Distribution Products for Green

WHO SHOULD ATTEND?

If you are an Engineer who selects and specifies HVAC products for commercial buildings and desire to know more about what qualifies and how to use products that will help you get LEED points on your next project, call your Titus Representative to register. This agenda is recognized for CEU's in some states.

SPEAKER:

Jim Aswegan is Chief Engineer at Titus with more than 40 years of experience providing HVAC solutions. He is also a member of ASHRAE.
