

ModuBloc

VISUALLY PLEASING / SUPERIOR PERFORMANCE

Titus Modu-Bloc diffusers are designed to be visually pleasing while providing superior performance. The Modu-Bloc is constructed so that a ceiling tile can be field cut and inserted in the face of the diffuser. This results in a smooth, clean appearance that blends with the ceiling.

- Designed so that a ceiling tile (by others) can be field cut and inserted in the face of the diffuser. The center panel of Model MB-30 matches the surrounding ceiling tiles. This results in a smooth, clean appearance that blends with the ceiling
- Supply diffuser delivers a one-, two-, three- or four-way horizontal throw or a vertical throw. With horizontal throw, the blanket of air is held tight against the ceiling even with varying volumes of air, making the MB-30 an excellent choice for VAV systems
- Uniform, unbroken flow pattern guards against ceiling smudging
- Discharge patterns are individually adjustable for each slot, resulting in combinations that fit the distribution requirements of the room
- Fits 24 x 24-inch ceiling grid
- Available in NT frame (MB-30-NT) and matching return units (MBR-30-NT)
