# VENTUS LUX

ARTFULLY COMBINING AIR, WATER AND LIGHT

SLEEK. VERSATILE. ENERGY EFFICIENT.

Lighting and air distribution systems usually compete for the same space, however with the creation of VENTUS LUX this is no longer an issue.

The VENTUS LUX is an active chilled beam device with a built-in LED lighting fixture that is high-performing and extremely flexible. Easily configurable for several applications, VENTUS LUX is the perfect solution for your next project. The design of the future is here today!
