

TND-AA

The Titus TND-AA diffusers are an excellent choice for applications that require large volumes of air with either directed and/or concentrated shots. Ideally suited for theaters, shopping malls, auditoriums, gyms and industrial applications. The TND-AA provides a 0 to 38 ° adjustable discharge with optional aperture damper for volume control.

FEATURES & BENEFITS

- Designed to handle large air capacity requirements and provide concentrated long throws
- Adjustable round nozzles within mounting rings up to 38 degrees
- Duct or hard surface mountable
- Optional aperture volume damper accessible on face of nozzle
