Notes:

- Throw values given are for terminal velocities of 150, 100 and 50 fpm, respectively at 20° F Cooling. See Engineering Guidelines section for additional information.
- Velocity pressures are calculated based on inlet duct velocities
- Noise Criteria (NC) is based on room sound attenuation of 10dB (per AHRI 885 Standard). NC values less than 15 are shown as "-".
- Data was obtained by tests conducted in accordance with standard ANSI/ASHRAE 70
