

Titus Timeout Podcasts

LEARN AT YOUR OWN PACE

HVAC Education Made Simple & Easy

Don't have time to watch a full webinar, then the Titus Timeout video podcasts are just for you! The weekly Khan Academy style videos are designed to be short discussions of HVAC topics. Ranging from 2 to 7 minutes, the initial videos covered the basics of pressure, sound, throw, and VAV systems. Later videos will go more in depth into the application of these topics as well as displacement ventilation and chilled beam systems, engineering challenges like perimeter heating and comfort, and new products.

For more information on Titus Timeout Podcasts, visit Titus University on our website or view our YouTube channel - Titus HVAC.
