

ESV-Q Terminal Units

Silencer models for quieter environments

Silence is golden in environments like hospitals and classrooms, where a quiet space is critical to health care and learning.

Titus ESV-Q terminal units include integrated silencers. Just remember Q, for quiet.

These silencer models use both baffling and acoustical media to disrupt sound waves and reduce sound levels to lower than what attenuators can attain through acoustical media alone.

QUIETLY ENGINEERED

- Maximizing sound absorption using internal geometries, baffling, and acoustic media
- Minimizing system pressure drops

SOUNDLY CERTIFIED

- ASHRAE Standard 130, Laboratory Methods of Testing Air Terminal Units
- AHRI Standard 885, Procedure for Estimating Occupied Space Sound Levels in the Application of Air Terminals and Air Outlets
