

SPECIAL APPLICATION

Chilled Beams

Efficient Comfort. Smarter Design.

Titus offers a full line of active and passive chilled beams designed to deliver superior thermal comfort while reducing energy use. By using water—a more efficient heat transfer medium than air—our systems lower energy costs for heating and cooling. Titus chilled beams are ideal for high-performance buildings seeking energy savings and occupant wellness.

FEATURES & BENEFITS

ACTIVE BEAMS

- Versatile offering of lengths and widths
- 2-pipe and 4-pipe coil configurations
- Available Titus grilles allow application flexibility
- Array of accessories and options to meet specific needs

APPLICATIONS

- Recessed Ceiling Mount
- Bulkhead Mount
- Sill Mount
- Wall Mount

MODELS

- CBAV: Recessed Ceiling
- CBAB: Bulkhead
- CBAS: Sill Mounted
- CBAW: Wall Mount

ENERGY EFFICIENCY

- Chilled beams handle sensible cooling and heating, allowing HVAC systems to work more efficiently by separating sensible and latent loads

COMFORT & PERFORMANCE

- Active chilled beams improve airflow by using high-velocity jets of ventilation air to induce room air over integrated water coils—boosting capacity and comfort
