

Round Ceiling Diffusers

Steel • Adjustable

Model: MV-1 • Vortex Diffuser

Standard Finish: #84 Black

General Description

- Model V-1 round ceiling diffusers are designed for both heating and cooling applications.
- Vortex generators spin the air in a spiral pattern. This creates a Coanda effect, forcing the air to adhere to the curved border and spread evenly across the ceiling.
- Uniform 360 degree discharge pattern.
- Excellent performance in variable air volume applications.
- Especially suitable for foyers, waiting rooms and other areas with recessed lighting fixtures. Complements black light and down light fixtures.
- Adjusted from horizontal to vertical discharge vortex by opening the blank-off plate in the center.
- Optional damper is adjusted through the diffuser face. Access for adjustment is gained by opening the blank-off plate.
- Material is steel.
