Model AG-95 Opposed Blade Damper

Available in duct sizes 6 x 6 through 15 x 15.

All dimensions are in inches.

Accessories (Optional)

Check if provided.

TRM TITUS Rapid Mount Frame

For Surface Mounting Border Type 3

Standard Finish: #26 White

General Description

- Model PMC-DF perforated modular core diffuser is extremely flexible and can be adjusted for a 1, 2, 3 or 4 way air pattern after it has been installed.
- The perforated face provides the architectural advantages of blending the diffuser into the ceiling system and at the same time offering the same performance of the modular core diffuser for variable air volume applications.
- Perforated face has 3/16" diameter holes on 1/4" staggered centers.
- Model PMC-DF is shipped with modular cores set for a 4 way throw.
- The perforated face discourages unwanted tampering with air pattern by providing a barrier to the modular core.
- Model PMC-DF diffuser maintains a horizontal flow pattern from maximum to minimum cfm, making it an excellent choice for VAV applications.
- Optional AG-95 opposed blade damper accessible by opening the perforated face and removing a modular core.
- Material: Perforated face, modular core, and backpan are steel.

This submittal is meant to demonstrate general dimensions of this product. The drawings are not meant to detail every aspect of the product. Drawings are not to scale. Titus
