

AG-95 / AG-95-AA

- For use with all Titus Series TDC louvered diffusers, as well as with all perforated diffusers having square or rectangular necks
- The blades distribute air evenly over the diffuser neck opening, in addition to regulating the airflow accurately. An operating lever is accessible from the face side of the diffuser.
- Attaches quickly with sheet metal screws directly to the diffuser neck (screws provided by others)
- Also available with a slot operator for use with Titus TDV and TDX model diffusers

AG-95 / AG-95-AA

air balancing

MODELS:

AG-95 / Steel
AG-95-AA / Aluminum

FINISH:

Standard Finish - #84 Black

OVERVIEW

Opposed Blade

Effective air balancing begins with the balancing provisions that are designed into the HVAC system. Titus balancing devices are easy to select and specify. They are designed for quick access and adjustment and are engineered for the least possible noise, turbulence and air resistance. Titus makes available published flow factors for all Titus diffusers. This allows precision balancing to be performed in the field with accuracy based on prior test results.
