

UnderFloor Linear Products

underfloor air distribution

TAF-D

- Designed for floor applications and utilized for ducted applications
- Heavy gauge steel plenum
- Installs into access flooring from top surface, removal of flooring is not required
- CT-TAF frame drops into plenum opening and sits on top of carpeting
- Can contribute toward achieving LEED certification

TAF-D

energy solutions

MODEL:

TAF-D / Diffuser Plenum with Inlet

OVERVIEW

The TAF-D ducted plenum is constructed of a heavy gauge steel and is designed for application in underfloor air distribution systems. It is used as a ducted supply or return unit. This product saves energy and can contribute toward LEED certification.
