

FlexRight

- FlexRight is a radius forming brace designed to form flexible duct into highly efficient 90° elbows
- FlexRight improves airflow and saves energy by eliminating kinks and restrictions common to flexible duct installations
- Great for retrofit applications or new building construction
- Green product that saves energy by improving airflow
- Made from 100% recycled material (copolymer polypropylene)
- Universal design fits flexible duct sizes: 4" - 16"
- UL Listed
- Nylon cable ties supplied by others

duct accessories energy solutions

MODEL:

FlexRight

OVERVIEW

FlexRight is made of 100% recycled materials, is UL listed and saves energy by reducing pressure loss through the duct work. The universal design accommodates all flexible duct sizes and diffuser inlets from 4" to 16". It provides a less expensive alternative to hard duct transitions and is easy to transport and install. With its simple and universal design, FlexRight is a great choice for both new construction and retrofit applications.

See website for Specifications

FlexRight 90° Elbow

Universal-mount, 1 piece, fully adjustable, radius-forming brace to support 4" (102-mm) through 16" (406-mm) diameter flexible air ducts
