

EOS

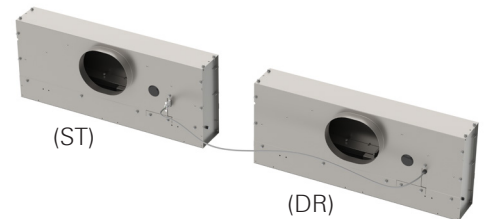

Harness the power of the sun to improve comfort while saving energy. EOS is more than just a smart choice. With adjustable temperature band and the ability to harvest energy from any light source; the auto-changeover EOS combines intelligence with flexibility, making it The Smartest diffuser.

eos 
THE SMART DIFFUSER

FEATURES & BENEFITS

- Auto-changeover diffuser with bi-directional air pattern for perimeter heating and cooling applications
- Smart logic programming checks supply air temperature in 10 minute intervals to ensure proper airflow direction is maintained for heating and cooling applications
- Operates on a narrow temperature band (71 degrees - 78 degrees)
- Available in two styles: Standard (ST) and Secondary (DR)
